

October Product Factsheet

Hilary
Birkbeck

Hilary Birkbeck

Profim is a local brand in a global world.

The company has been building its position on the European market for almost 30 years, and has been a member of the Flokk Group for two. We believe that beautiful interiors can be created with any budget. Well-designed furniture might be affordable and of high quality. That is how we understand good design.

October collection

October is an impressive collection of armchairs and sofas, which, thanks to the departure from minimalist, geometric forms, the introduction of richer colors and materials such as wood, allows you to create a space with a more friendly character.

- Leisure furniture with a soft and friendly appearance, ideal for hotels, guesthouses, offices and other public places.
- Rich colors of finishes and the possibility of using wooden legs allows the collection to fit into both modern and classic interiors
- Quilted cushions on the seat and backrest, finished with buttons that decorate the whole
- A large number of elements of the collection allows for the creation of various arrangements
- Tables in two sizes with a choice of two types of tops (wooden or wooden with a glass insert)

Quality

Profim provides a 5-year warranty for products used 8 hours a day, 5 days a week (single shift operation).
